

# Safety Guide for PNEWS Token

Welcome to Pepe News Token (PNEWS)! To ensure that you have a safe and secure experience, please follow the best practices outlined in this guide when buying, holding, or interacting with the \$PNEWS token.

## 1. Verify the Contract Address

Always double-check that you are using the correct contract address for PNEWS Token. The official contract address is:

0xE929Ed70A86e83de09fE9d6511C76C7d458Ba5B6

Never trust random contract addresses from unofficial sources. Always verify addresses through official channels such as the official website or verified social media profiles.

## 2. Protect Your Private Keys

Your private keys are the keys to your wallet. Never share your private keys or recovery phrases with anyone. No legitimate service or token provider will ever ask you for your private keys. Keep your keys stored in a secure location, such as a hardware wallet.

## 3. Use Trusted Wallets

Only use wallets and exchanges that are widely recognized and trusted in the crypto community. MetaMask, Trust Wallet, and Ledger are examples of reputable wallets that support \$PNEWS Token. Always ensure your wallet is up-to-date with the latest security patches.

## 4. Beware of Phishing Scams

Phishing scams are a common way for attackers to steal your funds. Be cautious of any unsolicited messages, emails, or links asking you to connect your wallet or transfer funds. Always verify the legitimacy of any site or message you receive.

#### 5. Avoid Unverified Platforms

Only engage with platforms that have been verified by official PNEWS channels. Do not connect your wallet to unknown websites or decentralized exchanges (DEXs). Use only trusted and reputable exchanges to trade \$PNEWS Token.

#### 6. Enable Two-Factor Authentication (2FA)

If your wallet or exchange supports it, enable two-factor authentication (2FA) for added security. 2FA will add an extra layer of protection to your account by requiring a secondary authentication method, such as a text message or authentication app, alongside your password.

#### 7. Do Not Share Your Seed Phrase

Never share your seed phrase or recovery phrase. This phrase is the key to restoring your wallet if something happens to your device. Keep it in a secure, offline location, such as a physical document or hardware wallet.

#### 8. Beware of Pump-and-Dump Schemes

Be cautious of anyone promising "guaranteed profits" or "get-rich-quick" schemes involving \$PNEWS or other cryptocurrencies. These could be pump-and-dump schemes designed to manipulate the market and benefit scammers at your expense.

#### 9. Research and Stay Informed

Always do your own research before investing in any token, including \$PNEWS. Read the whitepapers, check the tokenomics, and stay updated with official announcements from the Pepe

News Token team through verified social media profiles, such as Twitter or Telegram.

#### 10. Report Suspicious Activity

If you encounter suspicious activities or feel uncertain about a transaction or platform, report it immediately to official Pepe News Token support channels. The PNEWS community values security and will work to ensure that fraudulent activities are minimized.

#### 11. Use Secure Connections

Make sure your device is connected to a secure, private internet connection when accessing your wallet or interacting with blockchain platforms. Avoid public Wi-Fi networks for any financial transactions.

#### Stay Safe, Stay Secure

By following these guidelines, you can minimize the risks involved with investing and interacting with PNEWS Token. Always prioritize your security and stay vigilant.

If you have any concerns or need further assistance, don't hesitate to contact Pepe News Token support through our official channels.
